Restriction Requirement

35 U.S.C. § 121

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- a. Group I, claim(s) 75-77, drawn to a method for assessing the effectiveness of non-nucleoside reverse transcriptase inhibitor antiretroviral therapy (NNRTI) by evaluating plasma samples for mutations at codon 236 in the HIV reverse transcriptase (RT), classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.
- b. Group II, claim(s) 78-82, drawn to a method for assessing the effectiveness of NNRTI therapy by evaluating plasma samples for mutations at codon 225 in the HIV RT, classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.
- c. Group III, claim(s) 83-89, drawn to a method for assessing the effectiveness of NNRTI therapy by evaluating plasma samples for mutations at codon 190 in the HIV RT, classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.
- d. Group IV, claim(s) 90-94, drawn to a method for assessing the effectiveness of NNRTI therapy by evaluating plasma samples for mutations at codon 188 in the HIV RT, classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.
- e. Group V, claim(s) 95-97, drawn to a method for assessing the effectiveness of NNRTI therapy by evaluating plasma samples for mutations at codon 108 in the HIV RT, classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.
- f. Group VI, claim(s) 98-102, drawn to a method for assessing the effectiveness of NNRTI therapy by evaluating plasma samples for mutations at codon 106 in the HIV RT, classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.
- g. Group VII, claim(s) 103-105, drawn to a method for assessing the effectiveness of NNRTI therapy by evaluating plasma samples for mutations at codons 106 and 227 in the HIV RT,

classified in class 435, subclasses 5 and 91.2, and class 536, subclasses 27.72 and 24.33.

The inventions are distinct, each from the other because of the following reasons:

Unrelated Inventions

Inventions I-VII are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04 and § 808.01). In the instant case, each of the identified methodologies is directed toward a different scientific objective that employs different reagents. Accordingly, separate searches will be required for group.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and require separate searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143). Applicant is also advised that the claims should be amended to reflect the election, where necessary.
